"Dat was 'zactly right," said Simms, as the two men went down together. "Ef all de men ob science would hang tergedder dis way, dar wouldn't be half de treuble an' oneasiness in de worl'."-Little Rock Garette.

CASE OF NOTT VS. SHOTT. We have received from a correspondent the following somewhat incoherent account of a duel which was fought in his neighborhood. Some way or other we are half in the dark about the result of the duel in question, but we shall leave the decision to our readers :

A duel was lately fought in Texas by Alexander Shott and John S. Nott: Nott was shot and Shott was not. In this case it is better to be Shott than Nott, There was a rumor that Nott was not shot, and Shott avows that he shot Nott, which proves either that, the shot Shott shot shot Nott, or that Nott was not shot, notwithstanding. Circumstantial evidence is not always good. It may be made to appear on trial that the shot Shott shot shot Nott, or, as accidents with fire-arms are frequent, it may be possible that the shot Shott shot shot Shott bimself, into its original elements, and Shott would be shot and Nott would be not. We think, however, that the shot Shott shot shot not Shott, but Nott ; anyway, it is hard to tell

A CUNNING PLAN.

A correspondence with hair was once attempted between a notorious Parisian thief in durance vile and his comrades ontside. A letter was sent to the prisoner from his sweetheart, containing merely a lock of hair wrapped in the leaf of a book. The jailor did not consider the souvenir important enough to be delivered ; but civilization. - New Orleans Picaguns. in a few days there came a similar enclosure, and yet another. This aroused suspicion, and the governor took the matter in hand. He examined the leaf of the book; it was that of a common novel, twenty-six lines on a page. Then he studied the hair, and noticed the small quantity of the gift. Counting the hairs he gets a good deal of course food. - Marathon found them of unequal length, and twenty-six Independent. in number, the same as the lines on the page. When told that "Zerulah was Joab's mother,"

he exhibited much joyousness, and told Powers and Fish that he was surprised that they didn't know their Bibles better.

A TEMPERANCE WOMAN. An impassioned orator thundered at a temperance mass meeting: "Why, in only one year, in twelve short months, the people of the United States drank 27,883,291 gallons of whiskey! How much of that hideous aggregate did you drink?" he shricked, glaring around at the respectable vice-presidents on the plat-form. And in the impressive silence that fol-lowed, the corresponding secretary arose and said that with the exception of the tonic drops ahe was compelled to take before breakfast, and the anti-malarial bitters that Dr. Bolus prescribed for her, and a little pale ale for her digestion, and a pint of beer at night, which she couldn't close an eye in sleep without it, and maybe an occasional drop of brandy for the nauralgy, she had not tasted a drop of spiritual mail prepaid, on receips of \$1.75.

The natural termination is five removes from these several points. Now, man being twenty years in growing, lives five times twenty years—that is, one hundred; the camel is eight years in growing, and lives forty years; and so with other animals. Professor F. divides life into equal halves growth and decline and these into infancy, youth, virility, and age; infancy extending to the twentieth year, youth to the fiftieth -because it is in this period the tissues become firm-virility from fifty to seventy-five-during which the organism remains complete-and at seventy-five old age commences.

PROPORTIONATE POPULATION OF CITY TO COUNTRY.-The steadily-growing tendency of the American people to concentrate in cities is shown by these figures: In 1790 one-thirtieth of the population only was in cities. In 1800 the proportion was one-twenty-fifth; in 1820, one-twentieth; in 1890, one sixteenth; in 1840, one person in every twelve lived in a city; in one-sixth; and in 1870 it was more than onefifth. Judging from the past increase, nearly one-fourth of the entire fifty millions of our population is gathered in cities. The long depression in agricultural pursuits has had much to do with this undesirable state of things, and the reaction in favor of those pursuits canno fail to do much towards arresting the growth of
